Συνολικός αριθμός προσφερόμενων θέσεων Πρακτικής Άσκησης: 5

Αντικείμενο απασχόλησης ανά θέση:

Θέση 1: Mobile Applications Engineer

We have an internship position open for a Mobile Applications Engineer interested in building amazing native iOS, Android smartphone and tablet applications, and implement features that change the way customers interact with their mobile device. As a Mobile Engineer at Threenitas S.A., you will join an engineering team dedicated in designing, implementing, and delivering amazing products directly to thousands of customers. We are committed to delivering a superb user experience and are just scratching the surface!

Qualifications:

- Familiarity with Object-Oriented design patterns and how they are used in software design
- Familiarity with any of the following programming languages Objective-C/Swift/Java/Kotlin.

Θέση 2: Software Engineer

We have an internship position open for a Software Engineer to join our development team in an enjoyable, challenging and creative environment. The team is responsible for the whole lifecycle of our platform infrastructure that supports our web and mobile apps. As part of our team, you will be involved in the development of interesting and often complex projects, such as content-management platforms, Web API's supporting mobile apps and cloud-based solutions. Our software solutions are built on top of the

Microsoft ASP.NET technology stack (C#, MVC), Angular or PHP (Laravel MVC), but we are always looking for new and exciting tools and technologies.

Qualifications:

- Knowledge of SQL
- Familiarity with Object-Oriented design patterns and how they are used in software design
- Exposure to front-end technologies, such as Javascript, HTML and CSS.

Candidate should have an interest in any of the following topics:

Game Programming with Unity

Cloud Technologies (Microsoft Azure, Amazon Cloud Services)

Node.js or similar frameworks

AI and Machine Learning Algorithms

Θέση 3: WEB Front-End Developer

We have an internship position open for a Front-End Developer to join our development team in an enjoyable, challenging and creative environment.

The team is responsible for our digital-media communication projects. Most of the time, you will be required to interface with designers in interpreting client requirements and guiding the design team in meeting project objectives. Implementation of these projects will require good knowledge of HTML and CSS, and a basic knowledge of Javascript.

Qualifications:

- Exposure to front-end technologies, such as Javascript, HTML and CSS.
- Familiarity with Bootstrap.

Θέση 4: Backend Developer

We have an internship position open for a Backend Developer to join our development team in an enjoyable, challenging and creative environment.

The team is responsible for the whole lifecycle of our platform infrastructure that supports our web and mobile apps. As part of our team, you will be involved in the development of interesting and often complex projects, such as content-management platforms, Web API's supporting mobile apps and cloud-based solutions. Our software solutions are built on top of the Microsoft ASP.NET technology stack (C#, MVC), Angular or PHP (Laravel MVC), but we are always looking for new and exciting tools and technologies.

Qualifications:

- Knowledge of SQL
- Familiarity with Object-Oriented design patterns and how they are used in software design
- Exposure to front-end technologies, such as Javascript, HTML and CSS.

Θέση 5: Full-Stack Developer

We have an internship position open for a Full-Stack Developer to join our development team in an enjoyable, challenging and creative environment.

The team is responsible for the whole lifecycle of our platform infrastructure that supports our web and mobile apps. As part of our team, you will be involved in the development of interesting and often complex projects, such as content-management platforms, Web API's supporting mobile apps and cloud-based solutions. Our software solutions are built on top of the Microsoft ASP.NET technology stack (C#, MVC), Angular or PHP (Laravel MVC), but we are always looking for new and exciting tools and technologies.

Qualifications:

- Knowledge of SQL
- Familiarity with Object-Oriented design patterns and how they are used in software design
- Exposure to front-end technologies, such as Javascript, HTML and CSS

An interest in any of the following topics:

Cloud Technologies (Microsoft Azure, Amazon Cloud Services)

Node.js or similar frameworks

AI and Machine Learning Algorithms
